

Consult with Schools & Teachers

We **guide schools through a comprehensive program evaluation** and development process designed to maximize existing school resources and build strategically towards ensuring that ALL learners are fully supported. Our approach is informed by current brain science research, layered atop a deep base of best practices drawn from some of the nation's most successful Learning Resources programs.

We believe that our teachers are our greatest asset, and they, too, deserve recognition and care for the work that they do to enrich the lives of our students. Schools need well-trained, dynamic teachers who have knowledge and experience in teaching students with learning differences.

Teachers matter! A teacher's influence goes far beyond academics and test scores. A great teacher changes lives, inspires learners, and makes learning engaging, meaningful, and relevant. A great teacher develops relationships with his/her students by providing a nurturing and safe environment where students are seen as individuals and know that their teachers care for them both inside and outside the classroom walls. As it is often said, students may forget what you say, but they will never forget how you made them feel. We are committed to helping teachers grow professionally by becoming expert master teachers.

What We Do:

- **Provide Workshops** on the following topics:
 - ✚ Narrowing the Reading Gap
 - ✚ Teaching Using a Neurodevelopmental lens
 - ✚ Universal Design for Learning
 - ✚ Learning Variations & Differentiated Learning Practices
 - ✚ Alternative Assessments
 - ✚ Social & Emotional Learning
- Help **identify resources** in developing a curriculum that will be meaningful, engaging, and impactful in students' lives. This will empower students to gain real agency over their educational journeys and the confidence needed to advocate for their own needs.
- **Design programs and staffing structures** that effectively support students with learning differences to succeed in a college preparatory curriculum.
- **Promote the usage of scaffolded and differentiated instruction** as well as personalized learning environments to reach students where they are.
- **Build consistent, thoughtful approaches for interpreting evaluations** and providing appropriate recommendations to families.
- **Assist in hiring skilled LD practitioners and faculty** members by leveraging our nationwide network of standout professionals in the field.
- **Train faculty** to better understand learning differences to better facilitate implementing classroom accommodations effectively.
- **Share best pedagogical practices** to help faculty reach students with maximum effectiveness.
- **Work with college counseling departments** to help their LD students leverage their unique challenges and differentiate themselves as successful applicants to right-fit colleges and universities.
